

ABSTRACTA DESIGN APPARATUS AND A METHOD FOR GENERATING AN  
IMPLEMENTABLE DESCRIPTION OF A DIGITAL SYSTEM

5

The present invention is a design apparatus compiled on a computer environment for generating from a behavioral description of a system comprising at least one digital system part, an implementable description for said  
10 system, said behavioral description being represented on said computer environment as a first set of objects with a first set of relations therebetween, said implementable description being represented on said computer environment as a second set of objects with a second set of relations  
15 therebetween, said first and second set of objects being part of a design environment.
